

CORPORATE TRAINING PROGRAMMES

AI Training for Your Workforce

Practical, tool-first programmes for teams across India

Technovids Consulting Pvt. Ltd. · Bengaluru · Est. 2019

Transforming India's workforce for the AI era.

Technovids Consulting Pvt. Ltd. is a Bengaluru-based training company delivering **AI, data, cloud and professional-skills training** for organisations. The company was incorporated in 2019.

Programmes are delivered **onsite at your workplace, in-house, or live online**, and are customised to your team's roles and goals.

Onsite training is delivered across India, from our head office in HSR Layout, Bengaluru.

TRAINING AREAS

AI · Data · Cloud · Professional
skills

What we train

AI

Generative AI, prompting, adoption
and AI engineering

Data

Data analytics, Power BI, SQL,
Tableau and Advanced Excel

Cloud

AWS, Microsoft Azure and Google
Cloud

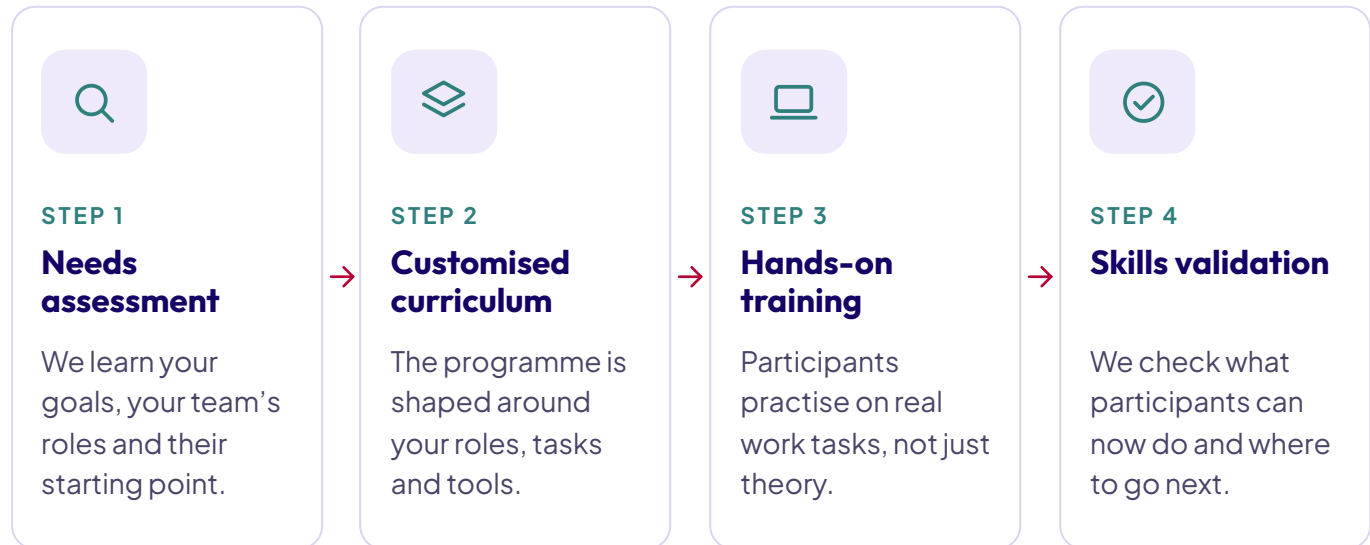

Professional skills

Leadership and professional-skills
programmes

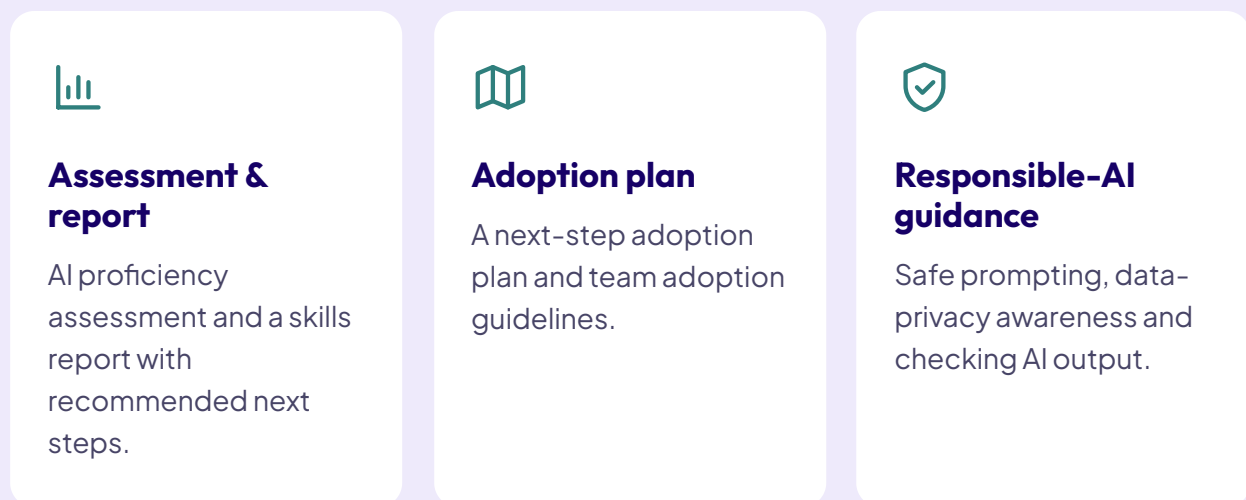

A clear path from need to new skills

Four steps, built around your organisation rather than a fixed syllabus.

After the training

Your team leaves with more than a certificate of attendance: a clear view of where they stand and what to do next.

Training that fits how your team works

Choose where and how your team learns. Every format is customised to your roles and goals.

Onsite

At your workplace,
anywhere in India.

Live online

For distributed teams,
delivered live with a
trainer.

Custom

Designed around your
roles and goals.

Programme length

● Half-day workshops

● One-day programmes

● Two-day programmes

● Custom multi-day programmes

No coding or programming background required for business-team programmes.

AI for business teams

Everyday AI skills for non-technical teams. Every programme is customised to your team's roles and goals.

01

ChatGPT & Claude for Business Teams

Who it is for: Staff in sales, operations, HR, finance and admin using AI assistants day to day.

YOUR TEAM WILL BE ABLE TO

- ✓ Draft and summarise documents, emails and reports faster with AI
- ✓ Turn meeting notes and long files into clear action points
- ✓ Check AI output for accuracy before sharing

🕒 **2 days** · Onsite or live online

02

AI for Business Professionals

Who it is for: Managers and professionals who want to apply AI to everyday decisions and tasks.

YOUR TEAM WILL BE ABLE TO

- ✓ Spot tasks in their own role where AI can help
- ✓ Use AI for research, analysis and first drafts
- ✓ Follow company rules on data and confidentiality when using AI

🕒 **1 day** · Onsite or live online

03

Prompt Engineering Training

Who it is for: Anyone who uses AI tools regularly and wants more reliable results.

YOUR TEAM WILL BE ABLE TO

- ✓ Write clear, structured prompts with context and examples
- ✓ Refine prompts step by step when results miss the mark
- ✓ Build reusable prompt templates for recurring tasks

🕒 **1 day** · Onsite or live online

04

Generative AI Fundamentals

Who it is for: Teams new to AI who need a clear, jargon-free foundation.

YOUR TEAM WILL BE ABLE TO

- ✓ Explain in plain terms what generative AI is and how it works
- ✓ Recognise its strengths, limits and common errors
- ✓ Use AI tools safely for simple day-to-day tasks

🕒 **1.5 days** · Live online or corporate onsite

More programmes, including SQL, Tableau, Advanced Excel, Google Cloud and leadership, at technovids.com/course

AI adoption and leadership

Helping leaders and teams put AI to work. Every programme is customised to your team's roles and goals.

05

AI Implementation for Teams

Who it is for: Team leads and managers rolling out AI across a function.

YOUR TEAM WILL BE ABLE TO

- ✓ Choose practical first use cases for their team
- ✓ Set up simple, shared ways of working with AI
- ✓ Review adoption and decide what to scale next

🕒 **2 days** · Corporate live online or onsite

06

AI Change Management for HR & L&D Leaders

Who it is for: HR, L&D and people leaders guiding workforce adoption of AI.

YOUR TEAM WILL BE ABLE TO

- ✓ Plan communication and learning for an AI rollout
- ✓ Address employee questions and concerns about AI openly
- ✓ Create guidelines and skill pathways for responsible use

🕒 **1 day** · Corporate live online or onsite

07

Claude AI Training Course

Who it is for: Teams that use, or plan to use, Claude at work.

YOUR TEAM WILL BE ABLE TO

- ✓ Work with long documents, files and structured analysis in Claude
- ✓ Organise recurring work with reusable instructions and context
- ✓ Review and verify Claude's output before using it

🕒 **Modular programme** · Onsite or live online

08

Production AI Engineering

Who it is for: Technical teams building AI into products and systems (RAG, agents, MCP).

YOUR TEAM WILL BE ABLE TO

- ✓ Build retrieval-augmented generation (RAG) over company data
- ✓ Design and test AI agents that use tools, including through MCP
- ✓ Evaluate, monitor and secure AI applications in production

🕒 **40 hours** · Corporate onsite or private live online

More programmes, including SQL, Tableau, Advanced Excel, Google Cloud and leadership, at technovids.com/course

Data and cloud

Analytics and cloud skills for modern teams. Every programme is customised to your team's roles and goals.

09

AI-Enhanced Data Analytics

Who it is for: Analysts and business users who work with data.

YOUR TEAM WILL BE ABLE TO

- ✓ Clean, explore and summarise data with AI assistance
- ✓ Use AI to help write formulas, queries and explanations
- ✓ Check AI-generated analysis against the source data

🕒 **2 days** · Onsite or live online

10

Power BI Training

Who it is for: Analysts and managers who build or use business reports.

YOUR TEAM WILL BE ABLE TO

- ✓ Connect, clean and model data in Power BI
- ✓ Build interactive dashboards and reports
- ✓ Share and maintain reports for their team

🕒 **20–24 hours** · Live online or corporate onsite

11

AWS Cloud Practitioner Training

Who it is for: Technical and non-technical staff who need a grounding in AWS.

YOUR TEAM WILL BE ABLE TO

- ✓ Explain core AWS services and cloud concepts
- ✓ Understand AWS security, pricing and support basics
- ✓ Prepare for the AWS Cloud Practitioner exam

🕒 **5 days** · Live online or corporate onsite

12

Microsoft Azure for Enterprise Teams

Who it is for: IT and engineering teams working in Microsoft environments.

YOUR TEAM WILL BE ABLE TO

- ✓ Navigate core Azure services for compute, storage and networking
- ✓ Apply identity, access and governance basics
- ✓ Plan and deploy workloads on Azure

🕒 **5 days** · Live online or corporate onsite

Before the programme

Programme scope follows your organisation's selected platform, licences, approved accounts and permissions.

Estimate the value for your team

Part A • ROI worksheet

Fill in with your own figures

A	Number of employees to train	
B	Hours per week each spends on writing, reporting, research or email	hrs
C	Average loaded hourly cost	₹
D	Estimated share of that time AI could speed up	%
E	Estimated hours saved per year = A × B × D × 46 working weeks	hrs
F	Estimated annual value = E × C	₹
G	Compare with your training quote	₹

Use your own conservative estimates. Results vary by role and task.

Part B • What published research has found

“Access to ChatGPT reduced time on writing tasks by 40% and raised output quality by 18% (453 professionals).”

Source: Noy & Zhang, *Science*, 2023

“Consultants using GPT-4 completed tasks 25.1% faster and produced work rated more than 40% higher quality. On a task outside AI’s strengths, they were 19 percentage points less likely to be correct.”

Source: Harvard Business School & BCG, 2023

“29% faster task completion in a simulated workday experiment (147 people).”

Source: Microsoft WorkLab, 2023

Independent research, not Technovids client results. It shows why training people to use AI well, and to know its limits, matters.

Every programme is quoted for your team.

There is no one-size price list.

What shapes the quote

Number of participants

Programme length

Onsite or live online

Level of customisation

Location for onsite delivery

Optional lab sandbox or virtual machines (arranged on request at a separate charge)

What we need from you

Participants bring their own laptops.

Confirm the AI tool accounts and permissions your company allows.
